RAISE THEM UP!

BKL's adjustable scope mount is the solution to never running out of vertical adjustment when using a scope. And it is made right here in Texas!

BKL Technologies, the Rimfire and Airgun Mount Specialist, is expanding the world's largest selection of airgun & rimfire dovetail mounting solutions to include an Adjustable Scope Mount System. Featuring BKL's patented Auto-Centering and Clamp Spreading technology, this mount is ideal for rifles that need additional scope elevation adjustment and for those trying to keep their crosshairs optically centered in the scope tube.

The BKL adjustable mount system is a significant improvement over traditional adjustable scope mounts available on the market today; this design incorporates side rails for mounting additional shooting accessories, a lower profile than usually achievable in an adjustable mount, 2.5 inches of clamping length with six clamping screws, and availability for 1 inch or 30mm scope tubes.

Specifications:	BKL-288 (1") 1 Inch Scope Tubes	BKL-388 (30mm) 30mm Scope Tubes
Overall Length:	4 inches	4 inches
Clamping Length:	2.5 inches	2.5 inches

Weight:	4.5 ounces	4.5 ounces
Bottom of Mount to Bottom of Scope Tube:	0.825 inches	0.825 inches

NEW PRODUCT BULLETIN

1+1=3 WITH BKL TRI-MOUNT

That's right. One 11mm or 14mm dovetail rail plus any of our Tri-Mount Riser Sets gives you three 11mm dovetail mounting rails where there used to be one. The additional .68" in height provides the target shooter a more heads up shooting position.

ELIMINATE CANTING ERROR WITH BKL 12-WAY LEVELS.

BKL's 12-way level eliminates canting error long range shooters often encounter. The level is easy to install and attaches to any 1 inch or 30mm scope tube. Position the level above, below, or to the side. When not in use the level conveniently folds for transport.
