

# NEW PRODUCT BULLETIN

# 1+1=3 WITH BKL TRI-MOUNT

*That's right. One 11mm or 14mm dovetail rail plus any one of our Tri-Mount Adaptor Sets gives you three 11mm dovetail mounting rails where there used to be one.*

BKL Technologies, the rimfire and airgun mount specialist, is expanding the world's largest selection of dovetail options to include new Tri-Mount Risers in 11 mm to 11mm and 11mm to 14 mm. The Tri-Mount riser design allows for additional dovetail mounting points on each side, instantly tripling the mounting surfaces of any dovetail mounting rail equipped airgun or rimfire rifle with no gunsmithing or additional tools. A mounting wrench is provided with each BKL Product.

The side facing dovetails allow for the installation of tactical lights, lasers, or other accessories and causes little change to the center of gravity. The top dovetail is .68" above the original rail for a more natural, heads-up shooting position.

The 11 mm Tri-mounts range in length from 0.6 inches to 4 inches and are available in matte black or matte stainless. The 14 mm introduction is available in a one inch length. The new risers and mounts feature BKL's patented Auto-Centering technology.

The new mounts are available now at your sporting goods dealer or online at [www.bkltech.com](http://www.bkltech.com). All BKL products are manufactured at our Fort Worth, Texas headquarters. BKL Technologies' patented competition-grade scope mounting systems include scope mounts, scope rings, dovetail to weaver/Picatinny adaptors, scope risers and scope levels that utilize a quick-installing and self-aligning clamping system that fits 11 mm, 14 mm and 3/8 inch dovetail mounting rails.
